

## Instructions for Printing

Included in the download is a PowerPoint File. Feel free to edit the colors and the fonts of the shapes in the file and add your practice logo for branding. To use as a chairside guide print the document on an 8.5"x11" paper and laminate for each operator.

You may also choose to print the poster to hang up in your office. The size and resolution of the poster is best printed at 18"x24". Larger sizes may have image quality degradation. There are many companies that are able to print the poster for you. Consult with each company on the format they would like for printing (ie PDF, jpg, tiff, png).

A cost-effective printing solution is [www.shorrunposters.com](http://www.shorrunposters.com); which can range from \$4.00-8.00 per poster plus shipping.

The author of the poster uses:

- 18"x24"
- Branded (a logo for shorrunposters will appear on the back side)
- 1.5 MIL Lamination
- Margin (of your choice), note selecting no margin will trim some edges off the poster.

After editing the PowerPoint to update the colors and your practice logo, you may save the file in the desired file type by navigating File -> Save As.. ->

Select the desired location and file type required by the printer:
